Mangels or Stock Beets

FARMERS AND STOCK RAISERS ATTENTION.

Too much cannot be said about this wonderful feed and every dairy and every farm and every stock raiser should have at least an acre or two of Stock Beets—the returns will be surprising. Sow early in the Spring and again in the Fall, give the ground thorough cultivation. After first cultivation, thin out, so as to stand 6 inches apart in the row, then cultivate same as you would corn. Sow 5 pounds to the acre, in rows $2\frac{1}{2}$ feet apart.

MAMMOTH LONG RED. No other variety of Mangels can compare with this in yield. It grows well above the ground, is easily harvested, the deep red roots are straight, well formed and solid. Especially well adapted for deep soil. On good soil they will sometimes grow 18 inches long; leaves are dark, the flesh white, being veined with rings of rose-pink. An excellent keeper and a wonderful milk producer when fed to dairy cows. Oz., 10c; $\frac{1}{2}$ lb., 40c; lb., 70c; 5 lbs., \$3.00, postpaid.

Early Dwarf Flat Dutch Cabbage.

Early Jersey Wakefield Cabbage.

Copenhagen Market Cabbage.

Wong Bok or Chinese Cabbage

This wonderful variety produces a beautiful, crisp, celery-like head that bleaches easily. As a salad it rivals the finest lettuce grown; when cooked like spinach or cabbage makes excellent "greens."

Sow seed in any good soil, making the rows 24 to 38 inches apart and thinning to 12 inches apart in the rows. It will not stand frost, so sow early in the Fall and again in the Spring. Be sure and try some of this wonderful variety, as it is easy to grow. Pkt., 10c; oz., 40c, postpaid.

Cauliflower

Cauliflower can be planted in the open in the Fall months or in hotbeds in the early Spring months; transplant when 4 or 5 inches high and water frequently, especially in dry weather. ¼ ounce to 100 feet of row; 4 ounces to the acre.

WIBOLIT'S EXPRESS SNOWBALL. This wonderful variety of fast growing, perfect heads of Cauliflower is produced in Denmark, and we would like you to read what the grower has to say: "I have at last succeeded in obtaining this grand stock; it is the result of a series of experiments which have gradually improved the seed to the highest grade of perfection. My Express Snowball is the earliest of all the Snowballs, the most dwarf, the most compact in habit of growth, the surest header; it gives the largest, most snow-white, cleanest heads and is a good keeper in dry weather." Pkt., 20c; oz., \$2.25, postpaid.

Chinese Cabbage.

Express Snowball Cauliflower.

Jackson's Money-Making Cantaloupe Seed

CULTURE. Cantaloupe thrive best in a light, rich soil; they should be planted as soon as the ground is warm, in hills 4 to 6 feet apart. In each hill apply well-rotted manure or a handful of commercial fertilizer, well mixed with the soil, plant about 14 seeds to each hill, covering about one inch deep. When plants are pretty well developed, thin out to about 3 plants to the hill. Cultivate frequently. One ounce to 60 hills; 2 to 3 pounds to the acre.

POLLOCK 10-25 (Salmon Fleshed). This is the most popular Melon used by the growers of Rocky Ford for home use and shipping to distant markets. It is very uniform in size and shape and does not develop soft spots like some other varieties; the flesh is sweet and very delicious, being very deep and fine grained and more salmon colored than the Pollock 25. The seed cavity is exceedingly small. Netting is heavy and even from stem to blossom. Matures early and is a rust resister. Cuts with a golden center, generally shading to a light green near the rind, and by all odds the best Cantaloupe introduced. The Pollock 10-25 brought a premium on the Houston market last year and to truckers as well as home gardeners we highly recommend this new wonderful type of Cantaloupe. NITRATE OF SODA

1,000 pounds of Nitrate of Soda will furnish more nitrogen to the plants early in the Spring than the gardener can get from 100 tons of well-rotted stable manure. The stable manure may help furnish nitrate for his later crop, but for his early crops the gardener who fails to use Nitrate of Soda is blind to his own interest. Nitrate of Soda is usually applied at the rate of 100 to 200 pounds per acre of land previously dressed with barnyard manure. To secure an even distribution the Nitrate should be well mixed with from three to five parts of lean or sand. We will be glad to furnish you free books on the use of Nitrate of Soda. Price per 100, f. o. b. Houston, \$5.50.

Onion Sets.

Bermuda Onion Plants

The usual manner of growing green Onions has, in the past, been by planting sets, but various tests have proven that the Onion plant is preferable. The set has to be absorbed by the new growth before it begins to form the new Onion, whereas the plant begins to grow as soon as it is planted and makes more headway than the set, producing delicious young Onions for table use during Winter and Spring. Onions grown from plants are larger and do not run to seed in the Spring like sets. Onions like rich soil, so the ground should be liberally fertilized. Plant in rows about 15 inches apart and 3 or 4 inches apart in the row. 35c per 100; \$1.25 per 500; \$2.25 per 1000; 5000 and over at \$1.75 per 1000, postpaid.

Beautify the Home With Choice Flowers

We specialize in flower seeds and list only varieties which have been tried and proven successful in our section of the country. A home can hardly be called a home without some bright colored flowers blooming in the yard, and adding cheer to the surroundings. Flowers, when care is exercised and common sense is used, are not hard to grow, and every home, every farm and every park should abound in them, and the school yards should be a source of pride and beauty.

Plant shrubs, but don't plant all shrubs and no flowers as so many do, as you need bright flowers for a contrast in color.

One thing should be borne in mind, flower seed should never be planted in a cold, wet ground, as they are delicate and will not readily germinate in adverse weather conditions. They should never be planted deep and the ground should be thoroughly prepared. A little care and attention will work wonders in a flower garden.

A stately, hardy annual of easy culture. Useful as a background or for a fence. The new types produce very showy flowers and nothing is prettier or brighter than to have a few of these ornamental varieties growing and blooming around the home.

CHRYSANTHEMUM SUNFLOWER. Simply wonderful for a Sunflower; you have to see them to appreciate what they are. Pkt., 10c.

The strain is new on the market, being minus the little white eye in most scarlet Verbenas, and having flowerlets of a very large size. We have been able to secure only a limited amount of seed, so if you want something in the brilliant scarlet type that is a pure red, be sure and order some of it immediately. Pkt., 15c.

Verbenas.

Plant Zinnias

Plant as late as September and will bloom until frost.

We have specialized in Zinnias for the past four years and our selected strains of Giant Zinnias, Dahlia-Flowered and Picotee Zinnias have met with such success, that we know what we offer in the Zinnia line is the best that money can buy. Nothing that you can plant will beautify and brighten up your garden more than Zinnias; they are easy to grow, but one thing must be borne in mind, that is not to plant them until the ground is warm, as Zinnias checked in their growth while young never amount to very much. Try a box of STIM-U-PLANT fertilizer on your Zinnias. See page 21.

Giant Zinnias

This is an improved Giant Double Zinnia, that often measures six inches across the surface; we have them in the following shades:

LIGHT FLESH or BLUSH PINK, LIGHT YELLOW, PURPLE, DEEP SALMON-ROSE, SCARLET, WHITE, CRIMSON, GOLDEN YELLOW.

SPECIAL MIXTURE. This mixture contains all of the above colors and shades and many others.

Price of Giant Zinnias, pkt., 10c; 6 pkts., 50c; ½ oz., 80c; oz., \$1.50, postpaid.

Picotee Zinnias

A distinct novelty in the Zinnia line, not quite as large as the Double Giants, but extremely beautiful and graceful in appearance, as the edges of the petals are all well marked with a different color than the body of the flower. The seed does not all produce a true Picotee flower, not more than 60 per cent, but those that do not come true are exquisite. All colors mixed, including a new shade. Pkt., 25c; 5 pkts. for \$1.00.

Double Giant Zinnia.

Dwarf Double Zinnias or Lilliput

This strain is a new one of small double flowers which can be used to a good advantage for borders or bedding. The flowers are very small, the bush being of a dwarf nature, producing an abundance of blooms. Be sure and try some of them.

CANARY YELLOW, LIGHT FLESH or BLUSH PINK, PURPLE, ROSE (Deep Salmon Rose), SCARLET, WHITE.

SPECIAL MIXTURE. Of the finest colors.

Price of Dwarf Double Zinnias, pkt., 10c; 6 pkts., 50c; ½ oz., 80c; oz., \$1.50, postpaid.

Quilled Zinnias

This is simply a beautiful type and stands out all alone. Each petal of this beautiful Zinnia is peculiarly quilled and twisted. The various shades of rose and lilac, when the petals twist, reflect very pleasing colors. Pkt., 25c.

Dahlia Flowered Zinnias

In 1924 The Royal Horticultural Society of England granted an "AWARD OF MERIT" for the strain, and a "GOLD MEDAL" for the group of DAHLIA-FLOWERED ZINNIAS exhibited in London, by the grower of the strains of Zinnias that we handle. The Dahlia-Flowered Zinnia is the latest thing in the Zinnia line and is undoubtedly the most handsome one that has been propagated so far by any grower. They are exceptionally large and the many shades and colors which they come in and with that Dahlia-like appearance make them simply indescribable.

EXQUISITE. By far the most pleasing of our collection. Truly dahlia-flowered as regards form and size, and the color is a beautiful light rose with a deep rose center. Pkt., 25c; 5 for \$1.00, postpaid.

DREAM. A fine, deep lavender, turning to a purple (mellow purple), a new and very desirable shade in the Zinnia line. Pkt., 25c; 5 pkts., \$1.00, postpaid.

PURPLE PRINCE. A fine deep purple, large and well formed; this is a new one and very pretty. Pkt., 25c; 5 pkts., \$1.00, postpaid.

POLAR BEAR. A very large pure white, true dahlia form and the best white in a Zinnia. Pkt., 25c; 5 pkts., \$1.00, postpaid.

Hints for Making and Caring for Lawns

Houston is noted for its beautiful lawns, and so few people appreciate that a Winter lawn can be made to look as attractive as a Summer lawn, and be green the entire Winter. So do not let another Winter go by with that old, dead grass on your lawn. English Rye and Italian Rye are good Winter grasses and stay green all through the Winter.

ENGLISH RYE. This is the foremost Winter grass and the foundation of all Winter lawn mixtures, and we know of no better grass for Winter lawn than English Rye Grass. English Rye should not be planted until the weather is cool, as it will not germinate in the hot months. Plant seed using one pound to a space 10 by 15 feet. It is easy to grow and makes one of the most wonderful lawns with that beautiful, green, velvety cast, such a contrast to other vegetation that is dead for the Winter, which surrounds most lawns. The seed should be broadcasted, following same with a thin coating of dirt, then wetting it down, and in a few days the seed will begin to germinate. Just for your own satisfaction, seed your lawn down this Winter in Winter Grass. **Lb., 40c; 5 lbs., \$1.75, postpaid.**

RED TOP. This variety of Winter grass has been used in the North for years, and until recently it was never planted in Texas, but is now a very popular Winter grass. It is used extensively in mixtures and on most all golf links. A fine variety for shady places. A mixture of English Rye and Red Top makes the best Winter lawn mixture you can buy. Use at the rate of one pound to a space 10 by 25 feet. **Lb., 90c; 5 lbs., \$3.75, postpaid.**

ITALIAN RYE. A Winter grass that is very similar to English Rye. Sow and plant the same as English Rye. **Lb., 40c; 5 lbs., \$1.75, postpaid.**

WHITE CLOVER. Also called "White Dutch Clover." This is the small, low-growing Clover that is so much desired for lawns; nothing is more beautiful than a little white Clover dotting a beautiful green lawn here and there. Used extensively in lawn mixtures. **Lb., \$1.00; 5 lbs., \$4.75, postpaid.**

OUR LAWN GRASS MIXTURE. This special mixture produces a beautiful and permanent lawn. It is made from our own formula and composed of grasses which are adapted to the purpose of producing a turf which retains its rich green color and velvety appearance throughout a long season. **Lb., 75c; 5 lbs., \$3.25, postpaid.**

BERMUDA GRASS. This variety is strictly a hot weather grass and is the only kind that will withstand the hot sun in the Summer time. Often people are under the impression that Bermuda Grass seed is mixed with weed seed, as they have gotten weeds, nut grass, etc., in their lawn after sowing the Bermuda seed, but such is not the case. Bermuda seed is tested for purity and is usually free from weed seed, and the weeds, etc., that come up in the lawn are from fillings or applying new dirt to the lawn, and by gradually working the weeds and foreign matter out, and allowing the Bermuda to grow, they will in time be choked out and you will get a permanent Bermuda lawn. Sow in the Spring of the year, when the ground becomes warm, or any time in the Summer, using one pound of seed to a space 10 by 50 feet. A beautiful green lawn can be obtained from the seed much cheaper than by sodding. Landscape men and those who have charge of golf links, appreciate this and have almost entirely ceased using sod, as a more even turf can be obtained from the seed than by sodding. The seed will germinate very readily when the weather is warm by sprinkling every day, as plenty of water is necessary. **Lb., \$1.00; 10 lbs., \$7.50, postpaid.**

NITRATE OF SODA. A little Nitrate of Soda lightly sprinkled over the lawns, adds new life to them, and all lawns are like everything else, they occasionally need renovating, and when your lawn needs new life, or you have dead spots in it, use Nitrate of Soda. **Lb., 15c; 2 lbs., 25c; 50 lbs., \$3.00; 100 lbs., \$5.50, not prepaid. By express or freight only; cannot be sent through the mail.**

BONE MEAL. Ground bone or Bone Meal is very necessary to all lawns; it should be the foundation of lawns. It takes about six months to decay, but when it does, it adds the required life that all lawns need. **Lb., 10c; 10 lbs., 75c; 50 lbs., \$2.75; 100 lbs., \$4.25, not prepaid.**

Giant Zinnias

Our strain of beautiful Giant Zinnias needs no introduction in this part of the country as we have received hundreds of compliments from people that have planted them. The many shades and colors in which they come and the enormous size of flower makes them one of the most popular flowers in South Texas and we unhesitatingly say that our strain is the finest that money can buy.

LIGHT FLESH OR BLUSH PINK. A very beautiful pastel shade.

LIGHT YELLOW. A solid bed of these make a beautiful showing.

PURPLE. A purple shade of Zinnia that is very pretty.

DEEP SALMON-ROSE. A shade that should be in every collection.

SCARLET. The brightest of the red shades.

WHITE. A pure white.

CRIMSON. Somewhat darker than the scarlet.

GOLDEN YELLOW. A beautiful orange shade.

SPECIAL MIXTURE. This mixture is made especially by the grower for us containing all of the above shades and many other shades not found in the regular field run mixtures.

PRICE OF GIANT ZINNIAS. Pkt., 10c; 6 pkts., 50c; $\frac{1}{2}$ oz., 80c; oz., \$1.50, postpaid.

Giant Mammoth Type Zinnias

In presenting this year this new type of Zinnia, we offer a very rare collection of the most striking and desirable colors. The objectionable features of the old Giant Zinnia have been overcome, this new mammoth type Zinnia having much smaller centers and more loosely placed petals. The flowers from the time they begin to bud until in full bloom present a very graceful appearance.

LEMON QUEEN. The petals of this immense Zinnia are light canary on the upper and cerise on the lower side, the two shades blending as the flower develops, making a variety of lemon tint. It is also unique as it carries a very pleasant odor. Pkt., 15c; 8 pkts., \$1.00, postpaid.

ROSE QUEEN. The flower opens first as a bright rose with a deep rose center and develops gradually into a warm, deep rose when in full bloom. The Rose Queen is unquestionably the most pleasing of this new type of Zinnias. Pkt., 15c; 8 pkts., for \$1.00, postpaid.

ORANGE KING. A very striking shade of orange-yellow and should be in every collection. Pkt., 15c; 8 pkts., \$1.00, postpaid.

PURITY. This is a pure, clean white Zinnia, having lost the greenish tint that has made so many white Zinnias unpopular in the past. Pkt., 15c; 8 pkts., \$1.00, postpaid.
